UI and UX Designer for mobile and web applications.
My engineering background leads me to approach design from a problem solving perspective.

UIUX Designer @ Mitsubishi Electric *Kamakura, Japan*   Jan 2018~

I've worked as a designer in 2 seperate groups in Mitsubishi's Integrated Design Center:

- **Design Engineering Group (R&D)** - Researching integrating design with emerging technologies like AR, VR, sensing, and data
- **Interaction Design Group (Product)** - Creating IoT experiences for Mitsubishi's products
  - Kirigamine Remote - Air Conditioner App

Responsibilities

- Creating wireframes and UX mockups using Sketch and other tools
- Working with users to conduct usability tests using paper & functional prototypes
- Creating UI design from wireframes and working with developers on implementation
- Interviewing people to create service experiences that meet their needs

B.S. Engineering @ Olin College of Engineering *Needham, USA*   Class of 2017

Concentration in Product Design

- Studied & practiced user-oriented, collaborative approaches to design
- Created mechatronic systems involving mechanical design, electronics, and software

Skills & Software

- User Interviews, Creating Personas, Wireframing, UX Design, UI Design, Behavior Design
- Sketch & Figma, Adobe Suite (Illustrator, Photoshop, Premier, After Effects, XD)
- HTML, CSS, Javascript, Jekyll
- English (Native), Japanese (Business - JLPT N1), Mandarin & Cantonese (Conversational)
