SENIOR UX DESIGNER | EcoATM

2022 ~ Present

ecoATM has kept over 50 million phones out of landfills since 2009 through our network of 7,500+ kiosks that buy & recycle secondhand devices. At ecoATM I am responsible for **end-to-end** experiences for both **ecoatm.com** & our **ecoATM mobile app**.

Design Expertise & Selected Impact

- Large scale redesign of ecoATM's mobile app. Introduced new **Price Your Device widget**, removed friction causing flows, and increased drop-off code generation by **25% on iOS & 13% on Android** (Mobile App, 2026)
- Redesigned ecoatm.com's **Price Your Device widget**, increasing over-all drop-off code generation by **2.18%** and driving **\$1.6M** in annual margin increase (Web, 2025)
- Maintained organization wide **design libraries** for web, mobile app, and kiosk components

AI Workflows

- Conducted usability study on **Device Prep** using **Figma Make** prototypes. Our AI prototype helped us test a larger variety user paths & avoided dead-ends typical in Figma prototypes.
- Modernized our **Personas** created in 2022 using **Claude** to analyze data collected from user surveys. This helps us continue to refine our understanding of the 2026 ecoATM user.
- Implemented customer facing landing pages using **Claude Code**, allowing us to ship without having to involve front-end developers.
- Turned designs on **Figma** into **UI tickets** complete with requirements & acceptance criteria using **ChatGPT**, saving our product managers valuable time

LEAD UX DESIGNER | Active Theory Inc

2020 ~ 2022

Sole UX designer, and front-end contributor for BitGym, a consumer fitness app, owning end-to-end product design for iOS & tvOS platforms.

- Led design of major features including **Bluetooth fitness tracker integration**, & launch of a **new tvOS app** for BitGym.
- Drove BitGym's **full rebrand**, redesigning product UI, website, and marketing surfaces
- Primary **front-end contributor** to BitGym's consumer & Active Theory's corporate website

INTERACTION DESIGNER | Mitsubishi Electric

2018 ~ 2020

Designed consumer-facing digital products at Mitsubishi Electric's Industrial Design Center in Yokohama, Japan focusing on **IoT** experiences for the **Japanese market**.

- Designed and presented concepts for **IoT air conditioning**, **elevator**, and **smart home hub applications**
- Collaborated cross-functionally in **Japanese** with design and engineering teams

OLIN COLLEGE | B.S. General Engineering & Product Design

Boston, MA

AI TOOLS

Figma Make, Figma MCP, Claude Code, ChatGPT, Codex, OpenAI Whisper

DESIGN TOOLS
