SENIOR UX DESIGNER | EcoATM Gazelle

2022 ~ Present

Senior UX designer responsible for **end-to-end** experiences for **web, mobile app, & kiosk** products in the **recommerce** space. ecoATM operates 7,500+ kiosks nationwide, while Gazelle is a consumer e-commerce business for buying & selling second-hand electronics.

Selected Impact

- Redesigned ecoATM's **Price Your Device widget**, increasing drop-off code generation by **2.18%** and driving **\$1.6M** in annual margin increase (Web, 2025)
- Redesigned **Gazelle.com** in our recent migration to Shopify Dawn resulting in **6%** increase in checkout conversion (Web, 2024)

Design Expertise

- Conducted **competitor research, system diagraming, and low fidelity wire-framing** for new features across ecoatm.com & gazelle.com
- Produced **high fidelity designs** with detailed documentation for developer hand-off
- Conducted **remote user studies** for web features & assisted with **in-person usability studies** for the ecoATM kiosk.
- Maintained organization wide **design libraries** for web, mobile app, and kiosk components
- Experimented with using **Figma Make** to replace traditional wireframing
- Researched **Figma** to **code** pipelines for design systems

Engineering & Delivery

- Contributed **front-end code** to ecoatm.com and gazelle.com, resolving **UI bugs** and implementation gaps
- Translated Figma designs into **Jira stories** with clear **requirements** and **acceptance criteria**

LEAD UX DESIGNER | Active Theory Inc.

2020 ~ 2022

Sole UX designer, and front-end contributor for BitGym, a consumer fitness app, owning end-to-end product design for iOS & tvOS platforms.

- Led design of major features including **Bluetooth fitness tracker integration**, & launch of a **new tvOS app** for BitGym.
- Drove BitGym's **full rebrand**, redesigning product UI, website, and marketing surfaces
- Primary **front-end contributor** to BitGym's consumer & Active Theory's corporate website

INTERACTION DESIGNER | Mitsubishi Electric

2018 ~ 2020

Designed consumer-facing digital products at Mitsubishi Electric's Industrial Design Center in Yokohama, focusing on **IoT** and **connected-device** experiences for the **Japanese market**.

- Designed and presented concepts for **IoT air conditioning, elevator, and smart home hub applications**
- Collaborated cross-functionally in **Japanese** with design and engineering teams
